YourSmartHome/Smart-Mart Team Contract

ROLES

- Task Master: Jane
  - Duties:
- Git Master - Charles
  - Duties:
- Test Master - Nick
  - Duties:

DAILY PROCESS

- Standup at start of assigned block of time, meeting at end of session:
  - Otherwise we'll schedule a time
- Pair programming through boiler plate, otherwise when necessary
  - Blocking issues
  - General questions
- Record issues that are non-blocking and discuss right after lunch at re-group meeting
- Slack announcements out when a given task is finished, make applicable PRs, review each other's code and merge into master

TEAM EXPECTATIONS

- Sacred times:
  - 6-8:30pm
  - Sundays
- If you have a blocking issue, slack before interrupting another's train of coding-thought
  - In general just slack first and we will each respond ASAP
- We will assign tasks vertically (instead of horizontally)
- None of us will specialize in terms of front-end and back-end code
- Hear each other out
  - Throwing ideas out
  - Suggesting ideas or alternatives
  - In general… ?
- There's no right way, but there are better ways
  - These are opportunities to learn and to teach!

- Keep each other posted on accomplishments and conflicts
  - Make sure no one is clueless about where the group is at

ISSUES

- If the group is divided on a certain decision we will take the following steps:
  1. Take 10-15 minute break
  2. List out the pros / cons
  3. Vote on it
  4. If the vote is split, escalate to a fellow or instructor
- If you are frustrated
  - Take a walk or get some water
  - Talk constructively about actionable items (e.g. raise your hand instead of interrupting, let me learn and struggle until I ask you for help, etc.)
  - Bring in a 3rd party (e.g. fellow, instructor) to mediate if you feel too frustrate
